

Children and Construction

Most construction sites are like oil and water for children; they don't mix. Conversely, like iron and a magnet, children are attracted to any type of construction. Children like to explore.

Guide for Discussion

Some general observations:

- Children don't recognize hazards as well as those who work on site.
- Locked equipment may still be a hazard.
- All excavations are potential forts or swimming pools.
- Scaffolds become gym sets.

Discouraging children:

- Don't allow children on site during the day.
- Erect a site fence.
- Mark excavations with signs or guard or both. (Remember: Fall protection rules.)
- Group and lock up equipment at night.
- Post "No Trespassing" signs.
- Ask for regular police patrols to check out your jobsite. If necessary, post a guard.

Additional Discussion Notes:

Remember: Most children will respect the builder's wishes and stay out. But some will not, and these are the ones that can get hurt or hurt your project from a vandalism standpoint. Experience indicates that those who have had a child injured on their sites find it can be quite a burden on one's conscience. We don't want that to happen on our job sites.

NOTE: Always promote a discussion on any of the topics covered in the Weekly Safety Meeting. Should any question arise that you cannot answer, don't hesitate to contact the Safety Director.
